

How to Get Started with the Project

Step 1: Unzip the File

1. **Download the ZIP file:** Click the download link to get the ZIP file.
2. **Unzip the file:**
 - On **Windows**: Right-click the ZIP file and select "Extract All".
 - On **Mac**: Double-click the ZIP file to unzip it.
 - On **Linux**: Use the command `unzip filename.zip` in the terminal.

Step 2: Install Dependencies

1. **Open a terminal** (Command Prompt on Windows, Terminal on Mac/Linux).
2. **Navigate to the project directory:** Use the `cd` command to change to the unzipped project folder.

`cd path/to/project-directory`

3. **Install the dependencies:**

`npm install`

Step 3: Run the Project

1. **Start the development server:**

`npm run dev`

2. **Open your browser:** Go to the URL displayed in the terminal (`http://localhost:5173`).
